

CLIMATE DECLARATION

for A2 Composite Panels
Declared unit: 1 m²

The climate declaration shows the emissions of greenhouse gases, expressed as CO₂-equivalents. It is based on verified results from a life cycle assessment (LCA) performed as basis for an EPD®, in accordance with ISO 14025.

Information about the product

Saray Al Composite Panels consist of mineral core bonded between two Aluminium panel sheets. Saray Al Composite Panels are very rigid and strong despite their light weight. Aluminium sheets are painted in any kind of colour, in PVDF or Polyester coatings.

Climate Declaration

The table below shows the emissions of greenhouse gases, calculated as carbon dioxide equivalents (kg CO₂ eq.) for 1 m² of A2 Composite Panel. The included life cycle stages are raw material supply, transport and product manufacture (A1-A3), transport to site (A4) and end of life stage (C1-C4).

| Product Stage (A1-A3) | Construction (A4) | End-of-Life Stage (C1-C4) |
|---------------------------|----------------------------|----------------------------|
| 35.6 kg CO ₂ e | 0.249 kg CO ₂ e | 0.056 kg CO ₂ e |

Other environmental information

This declaration is limited to the impact on climate change by emissions of greenhouse gases. Further information about other relevant environmental aspects is available in the EPD® at www.environdec.com and www.epdturkey.org.
